Pedro Gallardo Nascimento

Granville, OH | +1 (740) 404-8546 | nascim_p1@denison.edu | github.com/nascimp1

Education

Denison University | Granville, OH — Aug 2023 - May 2027
Bachelor of Arts, Computer Science

- **Relevant coursework:** Data Structures & Algorithms | Data Systems | Intro to Computer Systems | Cryptography | Intro to Data Analytics | Intro to Macroeconomics

Relevant Skills

Programming and Data Tools: Python | R | SQL | C++ | Pandas | GGPlot | GGFortify | HTML | JavaScript | Microsoft Office | Microsoft Excel
Software Tools: VS Code | Jupyter Notebook | RStudio
Spoken Languages: Portuguese (Native) | Spanish (Advanced) | English (Fluent)

Projects

IMDb Cross Country Film & Market Analysis | SQL, Python (pandas, matplotlib), IMDb Data — Fall 2024
Anglophone vs Non-Anglophone Movies: Comparisons Within and Between

- Designed and executed SQL queries and Pandas workflows to collect, clean, and maintain large transaction-style datasets spanning 100+ countries and 10+ industry categories.
- Built structured, repeatable data pipelines to ensure data integrity, version control, and consistent reporting outputs.
- Developed charts, tables, and data visualizations using Python (Pandas, Seaborn) to communicate findings clearly to non-technical audiences.
- Synthesized insights from 10+ analytical iterations, summarizing key findings in concise written reports to support data-informed conclusions.

Drug Use & Mental Health Analysis | R, RStudio, NSDUH Data — Fall 2024
Substance Use and Mental Health: A Statistical Analysis of U.S. State-Level Trends

- Cleaned and merged 4 NSDUH survey tables across 50+ U.S. states/regions, transforming raw self-reported data into an analysis-ready dataset in R.
- Built 4 linear regression models to assess the impact of illicit drug use and marijuana use on serious mental illness and suicide rates, interpreting key metrics (p-values, R^2, confidence intervals).
- Identified that drug use predictors explained less than 4% of variance in mental illness rates ($R^2 \approx 0.036$), while a 3-predictor suicide model achieved 30% explanatory power ($R^2 = 0.299$).

Work Experience

EMBRATUR | Brasilia, Brazil — Jun 2024 – Aug 2024
Translation and Research Intern

- Translated 28,000+ words for a national tourism publication covering 35+ cities, ensuring clarity and consistency for international audiences.
- Researched and standardized terminology for 50+ cultural and regional assets, creating a shared glossary to improve documentation quality and cross-team alignment.
- Conducted weekly quality reviews and maintained strict editorial deadlines while managing multiple concurrent assignments.
- Supported EMBRATUR's international outreach mission by delivering publication-ready translations targeting Brazil's 6.6M+ annual international tourist audience.

Modern Languages Department | Granville, OH — Aug 2024 – Dec 2024
Spanish Teaching Assistant (TA)

- Translated complex linguistic concepts into learning modules for 20+ students, adapting content to various proficiency levels.

Portuguese Teaching Assistant (TA) — Feb 2024 – May 2024

- Held weekly office hours over one semester, providing individualized academic support to 25+ students across varying proficiency levels in Portuguese grammar, writing, and oral skills.
- Evaluated and graded written assignments and exams for 15+ students, delivering detailed feedback that identified recurring errors and guided towards targeted improvement.
